DETAILED ACTION

Election/Restrictions

As a preliminary matter, applicants state at page 4 of the REMARKS, 4/2/03 that claim 25 has been cancelled. However, there is nothing on the record that cancels said claim 25.

Accordingly, claim 25 is included in the restriction below.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 12-13 and 21-25, drawn to a method for generating a secondary library of scaffold protein sequences with a library of primary sequences using a force field calculation.
- II. Claims 14-15, drawn to a method of generating a secondary library using computationally method with PDA.
- III. Claims 16 and 19-25, drawn to a method for generating a secondary library of scaffold protein variants with a primary sequences utilizing an alignment program.
- IV. Claims 17-18, drawn to a method using a computational method of PDA.

Art Unit: 1639

- V. Claims 26-30, drawn to a method for generating secondary library by probability distribution of amino acids without a primary sequence.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to different methods with different requirements or components and/or steps. Group II, for example, requires using PDA not necessarily require by Group I. Groups I-IV require a library of primary sequences, not require in Group V.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, and the search required for Group I is not required for Groups II-V, specifically the literature searches that are not coextensive with U.S. Patents and foreign searches, restriction for examination purposes as indicated is proper.

Art Unit: 1639

This application contains claims directed to the following patentably distinct species of the claimed invention:

The synthesis of secondary library with PCR (e.g., claims 21-24) or the non-synthesis of secondary library.

The claims with synthesis of secondary library with PCR are distinct from the claim without synthesis with PCR or the synthesis can be done by chemical or other biochemical means.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 12, 14, 16, 17 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant

Art Unit: 1639

must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
